Project Title	Personalized Networking Assistant
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal aims to improve professional and social networking by using Artificial Intelligence to generate personalized conversation starters. It helps users prepare for networking events, verify facts using reliable sources, and review previous conversations to improve networking skills. The application combines FastAPI, Streamlit, DistilBERT, GPT-2, and the Wikipedia API to provide an interactive and intelligent user experience.

Project Overview	
Objective	Develop an AI-powered application that generates personalized conversation starters, verifies facts, and helps users improve their networking skills.
Scope	The project covers AI-based conversation generation, fact-checking, conversation history management, feedback collection, and an interactive web interface using FastAPI and Streamlit.
Problem Statement	
Description	Many students and professionals struggle to start meaningful conversations, verify networking-related information, and track their networking progress.
Impact	Solving these challenges improves communication confidence, networking effectiveness, and user engagement during professional and social events.
Proposed Solution	

Approach	Use DistilBERT to extract event themes, GPT-2 to generate personalized conversation starters, and the Wikipedia API for fact verification through a FastAPI backend and Streamlit frontend.
Key Features	• AI-generated personalized conversation starters. • Wikipedia API-based fact checking. • Conversation history and feedback management. • Interactive and user-friendly Streamlit interface.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications	Intel i3/i5 or higher (GPU optional for AI model execution)
Memory	RAM specifications	Minimum 4 GB (8 GB Recommended)
Storage	Disk space for data, models, and logs	10 GB Free Disk Space
Software		
Frameworks	Python frameworks	FastAPI, Streamlit
Libraries	Additional libraries	Transformers, PyTorch, Wikipedia API, Pytest
Development Environment	IDE	Visual Studio Code / PyCharm
Data		

Data	Source, size, format	User-provided event descriptions and interests; Wikipedia API responses; JSON/Text format
