Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Network Starter Generator	Single-page UI form capturing event descriptions and custom profile keywords to build targeted AI icebreaker scripts.	Implemented	Yes	Processes text inputs and delivers structured, high-impact conversational cards instantly.
2	Zero-Shot Meta-Tagging	Core analytical layer classifying input text to extract and display visual semantic keyword tags mapping core topics.	Implemented	Yes	Color-coded dynamic UI badges display theme tags (e.g., artificial intelligence) upon generation.
3	Quick Fact Verification	Background check utility matching text search topics on-the-fly with live	Implemented	Yes	Successfully fetches Wikipedia

		scraped reference databases.			snippets and displays actionable advice panels inside the UI window.
4	Local Logging System	Persistence data engine keeping chronological session track markers safely within local system files.	Implemented	Yes	Appends generation payload logs directly into history.json upon hitting the refresh button.
5	Interactive Telemetry Log	User action trackers capturing feedback on generated cards to optimize future response structures.	Implemented	Yes	Tracks user submission counts straight into feedback.json when action keys (👍 / 👎) are clicked.
6	Automated Test Harness	Backend validation framework inspecting input payload fields, length constraints, and path exceptions.	Implemented	Yes	Executed via pytest framework, returning clean green success parameters across all edge cases.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
