Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User and AI Services (DistilBERT, GPT-2, Wikipedia API) that send and receive data
Rectangle with numbered header	Process	Handles user requests, generates conversation starters, performs fact-checking, and returns results.
Rectangle (solid fill, no number)	Data Store	Stores user requests, conversation history, and feedback.
Labeled arrow	Data Flow	Transfers event details, AI requests, generated responses, history, and feedback between components.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
