

Brainstorming & Idea Prioritization Template

Date	26 June 2026
Team ID	xxxxxxx
Project Name	Personalized Networking Assistant
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	C. S. Madhulika	Proposed developing an AI-powered Personalized Networking Assistant for generating smart conversation starters using NLP and Generative AI.	Project Idea	1
2	C. S. Madhulika	Suggested a modular architecture using FastAPI for backend services and Streamlit for the frontend to ensure scalability and easy maintenance.	Technical Architecture	2
3	C. S. Madhulika	Recommended integrating a fact-checking feature using the Wikipedia API	Feature Enhancement	3

		along with conversation history and feedback logging for personalization.		
4	Meghana Kaverigari	Suggested allowing users to enter event descriptions and personal interests to generate customized networking conversation starters.	User Experience	1
5	Meghana Kaverigari	Proposed displaying conversation history and user feedback to help users review and improve their networking strategies.	User Interface	3
6	Meghana Kaverigari	Suggested implementing unit testing with pytest to ensure application reliability before deployment.	Testing & Quality Assurance	2

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
-----------	------------	-------------------------------	------------------------------	----------	-------------------

1	AI-powered Personalized Networking Assistant with smart conversation generation	High	High	1	Yes
2	Modular FastAPI + Streamlit architecture with unit testing	High	High	2	Yes
3	Fact-checking, conversation history, and feedback system	High	High	3	Yes
