

Solution Requirements

Date	27 June 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>Users access the application to generate conversation starters and view history.</i>	<i>Medium</i>
2	Authorization levels	<i>Single user role with access to all application features.</i>	<i>Low</i>
3	External interfaces	<i>Integrates with Wikipedia API, DistilBERT, GPT-2, FastAPI, and Streamlit.</i>	<i>High</i>

4	Transactions processing	<i>Processes user input, generates AI responses, stores history, and records feedback.</i>	<i>High</i>
5	Reporting	<i>Displays conversation history and user feedback through the dashboard.</i>	<i>Medium</i>
6	Business rules, etc.	<i>Generate conversation starters based on event description and user interests; perform fact checking before displaying results.</i>	<i>High</i>
7	Compliance to laws or regulations	<i>Protect user data and use APIs according to their usage policies.</i>	<i>Medium</i>
8	<i>Other</i>	<i>Allow users to review previous conversations and improve networking skills.</i>	<i>Medium</i>

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	<i>Generate responses quickly.</i>	<i>Response in < 3 seconds (2 seconds)</i>
2	Scalability	<i>Support multiple users simultaneously.</i>	<i>Supports 100+ concurrent users</i>
3	Security & Data Privacy	<i>Secure API communication and protect stored data.</i>	<i>HTTPS and secure API handling</i>

4	Reliability & Availability	<i>Ensure stable application performance.</i>	<i>99% uptime</i>
5	Usability & Accessibility	<i>Simple, user-friendly Streamlit interface.</i>	<i>Easy navigation with responsive UI</i>
6	<i>Other</i>	<i>Maintainable modular architecture using FastAPI and Streamlit.</i>	<i>Easy to update and extend</i>
